Dispersion includes only those portfolios that have been included in the composite for the entire year.
- j. The three-year ex-post standard deviation is not required for periods prior to 2011.
- k. Past performance is not indicative of future results. Other methods may produce different results, and the results for individual portfolios and for different periods may vary depending on market conditions and the composition of the portfolio. Care should be used when comparing these results to those published by other investment advisors, other investment vehicles and unmanaged indices due to possible differences in calculation methods.
